

bcl2fastq  
muxdir: Project\_MUX3394

fastqc  
muxdir: ./out/Project\_MUX3394

report

final

```
graph TD; A["bcl2fastq<br/>muxdir: Project_MUX3394"] --> B["fastqc<br/>muxdir: ./out/Project_MUX3394"]; A --> D["final"]; B --> D; C["report"] --> D;
```

The diagram is a flowchart with four nodes, each in a rounded rectangle. The top node is yellow and labeled 'bcl2fastq' with 'muxdir: Project\_MUX3394' below it. An arrow points from this node to a cyan node labeled 'fastqc' with 'muxdir: ./out/Project\_MUX3394' below it. Another arrow points from the yellow node to a red node at the bottom labeled 'final'. A third arrow points from the cyan node to the red node. A fourth node, green and labeled 'report', has an arrow pointing to the red node.
